"Enthusiasm is contagious"

If what they say is true, that enthusiasm is contagious, my goal is to sneeze all over the earth. On a scale from 1-100, my enthusiasm, passion, and love for learning/teaching is a 100. I love them both! I spend almost all of my free time learning and all of my work time (Teacher...Curriculum Specialist) trying to ignite this enthusiasm in others. I have found, over the years, that when you are passionate about learning/teaching, students respond with more passion. When you make learning/teaching fun, relevant, purposeful, autonomous, and rewarding, it really can be addicting to anyone. I will continue to learn everything that I possibly can, but what is more meaningful to me, is that I will continue trying to ignite a "passion for learning" for sure, in every person that I possibly can.

Remember...

❖ Critical Thinkers-Learning to ask good questions is a powerful way to improve critical thinking in students of all ages.
❖ Problem Solvers-Problem solving requires experimentation of new and familiar concepts while processing information until a solution is reached.
❖ When you change nothing, nothing will change. With a new positive attitude, you can really make a difference. Make each day amazing.
❖ The best teachers teach from their heart, not from a book!

Everyone Can Learn!

My mission, having been a classroom teacher, is to supply every child with the tools to learn! Students came into my classroom at all levels and I felt it was my job to create learning experiences that would challenge all learners and inspire each of them to reach higher, dig deeper, and love learning!

Vonnie (Mrs. Purple) Lewis
